Contents of Volume 54

No. 1. JANUARY 1983

ANNOUNCEMENT

Statistics update 1

BRIEF REVIEW

Ionic mechanisms of cerebrospinal fluid acid-base regulation
E. E. Nattie 3

Lactate accumulation relative to the anaerobic and respiratory compensation thresholds
J. Simon, J. L. Young, B. Gutin, D. K. Blood, and R. B. Case 13

Blood lactate threshold in some well-trained ischemic heart disease patients
E. F. Coyle, W. H. Martin, A. A. Ehsani, J. M. Hagberg, S. A. Bloomfield, D. R. Sinacore, and J. O. Holloszy 18

Endotoxin protects against hyperoxic alterations in lung endothelial cell metabolism
E. R. Block 24

Role of bacterial endotoxins of intestinal origin in rat heat stress mortality
D. A. DuBose, K. Basamania, L. Maglione, and J. Rowlands 31

Anesthesia alters the pattern of aerosol retention in hamsters
T. D. Sweeney, J. D. Brain, and S. LeMott 37

Regulation of glycogenolysis in human muscle in response to epinephrine infusion
D. Chasiotis, K. Sahlin, and E. Hultman 45

Changes in electromyogram power spectra of facial and jaw-elevator muscles during fatigue
A. van Boxtel, P. Goudswaard, G. M. van der Molen, and W. E. J. van den Bosch 51

Effect of hyperoxia on metabolic and catecholamine responses to prolonged exercise
E. T. Howley, R. H. Cox, H. G. Welch, and R. P. Adams 59

Transvascular fluid flux measured from intravascular water concentration changes
L. Oppenheimer, H. W. Unruh, C. Skoog, and H. S. Goldberg 64

Dynamic measurements of CO diffusing capacity using discrete samples of alveolar gas
B. L. Graham, J. T. Mink and D. J. Cotton 73

Eccentric exercise-induced injury to rat skeletal muscle
R. B. Armstrong, R. W. Ogilvie and J. A. Schwane 80

Inhibition of pulmonary macrophage function by airway mucus
K. H. Woodside, S. M. Denas, K. L. Smith, C. S. Kim, and A. Wanner 94

Effect of increased blood oxygen affinity on skeletal muscle surface oxygen pressure fields
E. Nylander, N. Lund, and B. Wranne 99

Novel effects of PGF_2 on airway function in asthmatic subjects
J. E. Fish, H. H. Newball, P. S. Norman, and V. I. Peterman 105

Determination of maximal aerobic power during upper-body exercise
M. N. Sawka, M. E. Foley, N. A. Pimental, M. M. Toner, and K. B. Pandolf 113

Blood osmolality in vitro: dependence on P_{CO_2}, lactic acid concentration, and O_2 saturation
D. Böning and N. Maassen 118

Blood osmolality during in vivo changes of CO_2 pressure
D. Böning, U. Vaas, and K.-M. Braumann 123

Effect of route of atropine delivery on bronchospasm from cold air and methacholine
D. Sheppard, J. Epstein, M. J. Holtzman, J. A. Nadel, and H. A. Boushey 130

Intravenous versus inhaled atropine for inhibiting bronchoconstrictor responses in dogs
M. J. Holtzman, M. P. McNamara, D. Sheppard, L. M. Fabbri, H. L. Hahn, P. D. Graf, and J. A. Nadel 134

Heteropore populations of bullfrog alveolar epithelium
K.-J. Kim and E. D. Crandall 140

Potentiation of oxygen toxicity in rats by dietary protein or amino acid deficiency
S. M. Deneke, S. N. Gershoff, and B. L. Fanburg 147

Elastic properties of the lung in acute induced asthma
D. Rodenstein and D. C. Stănescu 152

Frequency dependence of plethysmographic volume in healthy and asthmatic subjects
D. O. Rodenstein and D. C. Stănescu 159

Effects of hypercapnia, hypoxia, and rebreathing on heart rate response during apnea
Y. C. Lin, K. K. Shida, and S. K. Hong 166

Effects of hypercapnia, hypoxia, and rebreathing on circulatory response to apnea
Y. C. Lin, K. K. Shida, and S. K. Hong 172

Effects of transient intracranial hypertension on lung fluid and protein exchange
H. van der Zee, P. H. Neumann, F. L. Minnear, and A. B. Malik 178

Axial distortion of airways in the lung
M. J. Kallok, S. J. Lai-Fook, M. A. Hajji, and T. A. Wilson 185

Evidence for modification of pulmonary cyclooxygenase activity by endotoxin in the dog
E. W. Spannhake, J. L. Colombo, P. A. Craigo, D. B. McNamara, A. L. Hyman, and P. J. Kadowitz 191

Simultaneous comparison of tracheobronchial and right duct lymph dynamics in dogs
D. J. Martin, J. C. Parker, and A. E. Taylor 199

Ascorbate uptake by isolated rat alveolar macrophages and type II cells
V. Castranova, J. R. Wright, H. D. Colby, and P. R. Miles 208

Physiological and pharmacological response of canine bronchial smooth muscle in situ
S. G. Hendrix, N. M. Munoz, and A. R. Leff 215

Pulmonary blood flow distribution measured by radionuclide-computed tomography
H. Maeda, H. Itoh, Y. Ishii, G. Todo, T. Mukai, M. Fujita, H. Kambara, C. Kawai, and K. Torizuka 225

Thermoregulation and acid-base status in the panting dehydrated fowl
Z. Arad 234

Effects of water immersion on plasma catecholamines in normal humans
M. Epstein, G. Johnson, and A. G. DeNunzio 244

Work-heat tolerance in endurance-trained rats
J. M. Fruth and C. V. Gisolfi 249

Response of ventral respiratory group inspiratory neurons to mechanical loading
R. G. Seaman, F. W. Zechman, Jr., and D. T. Frazier 254

Pulmonary vascular tone is a determinant of basal lung perfusion in normal seated subjects
B. Nemery, W. Wijns, L. Piret, F. Caùwe, L. Brasseur, and A. Frans 262

Lung vascular effects of phorbol myristate acetate in awake sheep
J. E. Loyd, J. H. Newman, D. English, M. L. Ogletree, B. O. Meyrick, and K. L. Brigham 267

Effects of *p*-chlorophenylalanine on ventilatory control in goats
G. S. Mitchell, C. A. Smith, E. H. Vidruk, L. C. Jameson, and J. A. Dempsey 277

Meclofenamate uniformly decreases shunt fraction in dogs with lobar atelectasis
R. C. Garrett and H. M. Thomas III 284

Human respiration at rest in rapid compression and at high pressures and gas densities
R. Gelfand, C. J. Lambertsen, R. Strauss, J. M. Clark, and C. D. Puglia 290

Sound speed in pulmonary parenchyma
D. A. Rice 304

SPECIAL COMMUNICATIONS

Statistics of response slopes
K. V. Mardia, S. Bogle, and R. Edwards 309

An elastic loading system for ventilatory studies in small animals
W. A. LaFramboise, R. E. Tuck, T. A. Standaert, and D. E. Woodrum 314

Errors in calculating cardiac output due to administration of perfluorochemicals
A. L. Rosen, S. A. Gould, L. R. Sehgal, H. L. Sehgal, and G. S. Moss 318

LETTERS TO THE EDITOR

Relationship between vascular resistance and venous pressure
T. C. Lloyd, Jr. 321

Alveolar surface, intra-alveolar fluid pools, and respiratory volume changes
J. Gil 321

ABSTRACTS FROM CURRENT LITERATURE

325

ANNOUNCEMENTS

330

No. 2. FEBRUARY 1983

BRIEF REVIEW

Respiratory heat and water exchange: physiological and clinical implications
E. R. McFadden, Jr. 331

Effects of the Clara cell toxin, 4-ipomeanol, on pulmonary function in rats
J. P. Sabo, E. C. Kimmel, and L. Diamond 337

Airway smooth muscle mechanics: reduced activation and relaxation
U. Kromer and N. Stephens 345

Alveolar-to-arterial P_{CO_2} differences
J. F. Green, M. Sheldon, and G. Gurtner 349

Human frontal sweat rate and lactate concentration during heat exposure and exercise
N. Fellmann, G. Grizard, and J. Coudert 355

Regional gas distributions and single-breath washout curves in head-down position
M. Demedts, I. Clarysse, M. Verhamme, M. Marcq, and M. De Roo 361

Effects of androgenic-anabolic steroids on neuromuscular power and body composition
D. M. Crist, P. J. Stackpole, and G. T. Peake 366

Lung vessel leak precedes right ventricular hypertrophy in monocrotaline-treated rats
T. Sugita, T. M. Hyers, I. M. Dauber, W. W. Wagner, I. F. McMurtry, and J. T. Reeves 371

Responses of cat's internal intercostal motor units to hypercapnia and lung inflation
H. Arita and B. Bishop 375

Metabolic and cardiorespiratory responses to the He-O_2 breathing during exercise
A. G. Brice and H. G. Welch 387

Production of pharmacologic monodisperse aerosols
G. C. Smaldone, H. Itoh, D. L. Swift, J. Kaplan, R. Florek, W. Wells, and H. N. Wagner, Jr. 393

Sinoaortic contribution to ventilatory control in exercising dogs
P. C. Szlyk, D. R. Pendergast, and J. A. Krasney 400

Decay of inspiratory muscle pressure during expiration in anesthetized cats
W. A. Zin, L. D. Pengelly, and J. Milic-Emili 408

Drinking and water balance during exercise and heat acclimation
J. E. Greenleaf, P. J. Brock, L. C. Keil, and J. T. Morse 414

Contact-angle hysteresis induced by pulmonary surfactants
B. A. Hills 420

High-frequency oscillations via the pleural surface: an alternative mode of ventilation?
H. E. Ward, J. H. T. Power, and T. E. Nicholas 427

Increased cardiovascular response to static contraction of larger muscle groups
D. R. Seals, R. A. Washburn, P. G. Hanson, P. L. Painter, and F. J. Nagle 434

Tissue ammonia and amino acids in rats at various oxygen pressures
A. K. Singh and E. W. Banister 438

Dynamic response of local pulmonary blood flow to alveolar gas tensions: analysis
B. J. B. Grant and A. M. Schneider 445

Role of chemical afferents in the maintenance of rhythmic respiratory movements
W. R. See, M. E. Schlaefke, and H. H. Loeschcke 453

Diaphragmatic contractility enhanced by aminophylline: role of extracellular calcium
M. Aubier, D. Murciano, N. Viires, Y. Lecocguic, and R. Pariente 460

How the abdominal muscles act on the rib cage
A. De Troyer, M. Sampson, S. Sigrist, and S. Kelly 465

Effect of glycogen depletion on the ventilatory response to exercise
G. J. F. Heigenhauser, J. R. Sutton, and N. L. Jones 470

Respiratory muscle function during CO_2 rebreathing with inspiratory flow-resistive loading
M. Lopata, E. Önal, and A. S. Ginzburg 475

CO_2 diffusing capacity in isolated dog lung lobes and the role of carbonic anhydrase
T. Enns and E. P. Hill 483

Plasma volume shifts during progressive arm and leg exercise
D. S. Miles, M. N. Sawka, R. M. Glaser, and J. S. Petrofsky 491

Phrenic activity and intercostal muscle EMG during inspiratory loading in newborn kittens
T. Trippenbach and G. Kelly 496

Effects of high-frequency oscillatory ventilation on vagal and phrenic nerve activities
G. C. W. Man, S. F. P. Man, and C. T. Kappagoda 502

Plasma volume, renin, and vasopressin responses to graded exercise after training
V. A. Convertino, L. C. Keil, and J. E. Greenleaf 508

Blood volume and protein responses to skin heating and cooling in resting subjects
M. H. Harrison, R. J. Edwards, L. A. Cochrane, and M. J. Graveney 515

Simulation of continuous blood O_2 equilibrium curve over physiological pH, DPG, and P_{CO_2} range
R. M. Winslow, M. Samaja, N. J. Winslow, L. Rossi-Bernardi, and R. I. Shrager 524

Effects of repetitive exercise on neonatal rat skeletal muscle oxidative capacity
A. M. MacIntosh and K. M. Baldwin 530

Effect of temperature on regulation of breathing and sleep/wake state in fetal lambs
I. R. Moss, A. J. Mautone, and E. M. Scarpelli 536

Unusual core temperature decrease in exercising heart-failure patients
F. G. Shellock, S. A. Rubin, A. G. Ellrodt, A. Muchlinski, H. Brown, and H. J. C. Swan 544

Development of histochemical and functional properties of baboon respiratory muscles
L. C. Maxwell, R. J. M. McCarter, T. J. Kuehl, and J. L. Robotham 551

Reflex control of breathing following inhalation of cigarette smoke in conscious dogs
L.-Y. Lee, R. F. Morton, A. H. Hord, and D. T. Frazier 562

Effects of stopping training on size and response to insulin of fat cells in female rats
B. W. Craig, K. Thompson, and J. O. Holloszy 571

Breathing He-O_2 shifts the lung pressure-volume curve of the dog
N. Berend, K. L. Christopher, and N. F. Voelkel 576

Muscle fiber composition and blood ammonia levels after intense exercise in humans
G. A. Dudley, R. S. Staron, T. F. Murray, F. C. Hagerman, and A. Luginbuhl 582

Coupling of ventilation to pulmonary gas exchange during nonsteady-state work in men
D. H. Wasserman and B. J. Whipp 587

SPECIAL COMMUNICATIONS

A new method for measurement of respiratory resistance
C. F. Shaw, S. T. Chiang, Y. C. Hsieh, J. Milic-Emili, and C. Lenfant 594

LETTERS TO THE EDITOR

Sustainable inspiratory pressure test can be influenced by airway obstruction as well as by respiratory muscle endurance
T. K. Aldrich; B. G. Nickerson 598

Breath-by-breath determination of alveolar gas exchange
H. V. Wessel, R. L. Stout, and M. H. Paul; K. Wasserman 598

ABSTRACTS FROM CURRENT LITERATURE 600

ANNOUNCEMENTS 607

No. 3. MARCH 1983

BRIEF REVIEW

Gas mixing within the acinus of the lung
L. A. Engel 609

Effect of height on alveolar liquid pressure in isolated edematous dog lung
K. C. Beck and S. J. Lai-Fook 619

Control of respiratory pattern in conscious dog: effects of heat and CO_2
S. Iscoe, R. B. Young, and D. B. Jennings 623

Nonapneic mechanisms of arterial oxygen desaturation during rapid-eye-movement sleep
E. C. Fletcher, B. A. Gray, and D. C. Levin 632

Responses of the lung periphery to ozone and histamine
A. Gertner, B. Bromberger-Barnea, R. Traystman, D. Berzon, and H. Menkes 640

Ventilatory and circulatory transients during exercise: new arguments for a neurohumoral theory
R. Favier, D. Desplanches, J. Frutoso, M. Grandmontagne, and R. Flandrois 647

Influence of pulmonary vasoconstriction on lung water and perfusion heterogeneity
C. A. Dawson, T. A. Bronikowski, J. H. Linehan, and T. S. Hakim 654

Roles of stress and adaptation in the elicitation of face-immersion bradycardia
B. H. Natelson, C. A. Nary II, G. A. Curtis, and D. Creighton 661

Low levels of concussive brain trauma and pulmonary edema
J. E. Millen and F. L. Glauser 666

Adaptation of vascular pressure-flow-volume hysteresis in isolated rabbit lungs
K. C. Beck and J. Hildebrandt 671

Hypoxic pulmonary hypertension in the mast cell-deficient mouse
Y. J. Zhu, R. Kradin, R. D. Brandstetter, G. Staton, J. Moss, and C. A. Hales 680

Inhibition of breathing movements in fetal sheep by prostaglandins
J. A. Kitterman, G. C. Liggins, J. E. Fewell, and W. H. Tooley 687

Distribution of histamine receptors in isolated canine airways
S. L. Bradley and J. A. Russell 693

Increased oxygen consumption associated with breathing activity in fetal lambs
D. W. Rurak and N. C. Gruber 701

Partitioning of respiratory mechanics in anesthetized cats
W. A. Zin, L. D. Pengelly, and J. Milic-Emili 708

Determination of forces in extensor pollicis longus and flexor pollicis longus of the thumb
K. N. An, W. P. Cooney, E. Y. Chao, L. J. Askew, and J. R. Daube 714

Biochemical and physiological effects of compound 48/80 on canine trachea in vivo
A. R. Leff, J. K. Brown, M. Frey, B. Reed, and W. M. Gold 720

Effects of 0.1 ppm nitrogen dioxide on airways of normal and asthmatic subjects
M. J. Hazucha, J. F. Ginsberg, W. F. McDonnell, E. D. Haak, Jr., R. L. Pimmel, S. A. Salaam, D. E. House, and P. A. Bromberg 730

Multiparameter monitoring of the awake brain under hyperbaric oxygenation
A. Mayevsky 740

Lobar flow patterns in a hollow cast of canine central airways
B. Snyder and M. J. Jaeger 749

Exercise training, sex hormones, and lipoprotein relationships in men
M. A. B. Frey, B. M. Doerr, L. S. Srivastava, and C. J. Glueck 757

Efficiency, maximal blood flow, and aerobic work capacity of canine diaphragm
M. B. Reid and R. L. Johnson, Jr. 763

Total airway resistance and respiratory muscle activity during sleep
J. M. Lopes, E. Tabachnik, N. L. Muller, H. Levison, and A. C. Bryan 773

Morphometric changes in rabbit lungs before and after pneumonectomy and exposure to ozone
E. S. Boatman, G. Ward, and C. J. Martin 778

Mechanical properties of alveolar wall after pneumonectomy and ozone exposure
C. J. Martin, E. S. Boatman, and G. Ward 785

Cardiovascular responses to treadmill exercise in rats: effects of training
T. T. Gleeson, W. J. Mullin, and K. M. Baldwin 789

Repeated development and regression of exercise-induced cardiac hypertrophy in rats
R. C. Hickson, T. M. Galassi, and K. A. Dougherty 794

Skeletal muscle mitochondria and myoglobin, endurance, and intensity of training
S. J. Harms and R. C. Hickson 798

Effects of acute hypercapnia on the central and peripheral circulation of conscious sheep
S. Matalon, M. S. Nesarajah, J. A. Krasney, and L. E. Farhi 803

Time course of posthyperventilation breathing in humans depends on alveolar CO_2 tension
H. Folgering and M. Durlinger 809

Dopamine and carotid body function in the newborn lamb
D. E. Mayock, T. A. Standaert, R. D. Guthrie, and D. E. Woodrum 814

Time course of the bronchoconstriction induced by inhaled histamine and methacholine
A. Cartier, J.-L. Malo, P. Bégin, M. Sestier, and R. R. Martin 821

Impaired red cell filterability with elimination of old red blood cells during a 100-km race
W. H. Reinhart, M. Stäubli, and P. W. Straub 827

Role of surface area-to-mass ratio and work efficiency in heat intolerance
Y. Epstein, Y. Shapiro, and S. Brill 831

Alveolar size as a determinant of pulmonary distensibility in mammalian lungs
P. S. Haber, H. J. H. Colebatch, C. K. Y. Ng, and I. A. Greaves 837

SPECIAL COMMUNICATIONS

Estimation of effective pulmonary capillary pressure in intact lungs
H. Holloway, M. Perry, J. Downey, J. Parker, and A. Taylor 846

BOOKSHELF

Occupational Lung Disorders 852

Books received for review 852

LETTERS TO THE EDITOR

Misconceptions and missed perceptions of the anaerobic threshold
K. Wasserman; G. A. Brooks 853

ABSTRACTS FROM CURRENT LITERATURE 856

ANNOUNCEMENTS 866

No. 4. APRIL 1983

BRIEF REVIEW

Body size, energy metabolism, and the lungs
A. A. Heusner 867

Sexual influence on the control of breathing
D. P. White, N. J. Douglas, C. K. Pickett, J. V. Weil, and C. W. Zwillich 874

Temperature sensitivity of skeletal muscle in the conscious goat
C. Jessen, G. Feistkorn, and A. Nagel 880

Gravity dependence of phases III, IV, and V in single-breath washout curves
M. Verhamme, J. Roelandts, M. De Roo, and M. Demedts 887

Sympathoadrenal responses to cold and ketamine anesthesia in the rhesus monkey
M. A. Kolka, R. S. Elizondo, and R. P. Weinberg 896

Effects of β-adrenergic blockade on O_2 uptake during submaximal and maximal exercise
P. A. Tesch and P. Kaiser 901

Effect of inflation on trachealis muscle tone in canine tracheal segments in vitro
S. J. Gunst and S. J. Lai-Fook 906

Histamine decreases selectivity of sheep lung blood-lymph barrier
J. E. McNamee 914

Expiratory motor responses in the suckling opossum
J. P. Farber 919

Methylprednisolone prevents venous resistance increase in oleic acid lung injury
W. F. Hofman and I. C. Ehrhart 926

Characteristics of airway tone during exercise in patients with asthma
D. R. Stirling, D. J. Cotton, B. L. Graham, W. C. Hodgson, D. W. Cockcroft, and J. A. Dosman 934

Effect of air embolism on the measurement of extravascular lung thermal volume
R. C. Allison, J. C. Parker, C. E. Duncan, and A. E. Taylor 943

Augmentation of cardiac function by elevation of intrathoracic pressure
M. R. Pinsky, W. R. Summer, R. A. Wise, S. Permutt, and B. Bromberger-Barnea 950

Pressure-flow relationships in a collaterally ventilating dog lung segment
L. E. Olson, J. R. Rodarte, and N. E. Robinson 956

Human sinus arrhythmia as an index of vagal cardiac outflow
D. L. Eckberg 961

Effects of histamine on lung water and hemodynamics after β-blockade
N. C. Olson, N. E. Robinson, and J. B. Scott 967

Sweating efficiency in acclimated men and women exercising in humid and dry heat
A. J. Frye and E. Kamon 972

Acid-base curve and alignment nomograms for swine blood
R. B. Weiskopf, M. I. Townsley, K. K. Riordan, D. Harris, and K. Chadwick 978

Role of lymphatics in removal of sheep lung surfactant lipid
M. M. Tarpey, H. M. O'Brodovich, and S. L. Young 984

Movement of CO_2 and HCO_3^- from blood to brain in dogs
D. C. Johnson, B. Hoop, and H. Kazemi 989

Ventilatory changes associated with changes in pulmonary blood flow in dogs
J. F. Green and M. I. Sheldon 997

Fluid shifts and muscle function in humans during acute simulated weightlessness
A. R. Hargens, C. M. Tipton, P. D. Gollnick, S. J. Mubarak, B. J. Tucker, and W. H. Akeson 1003

Extra-alveolar vessel contribution to hydrostatic pulmonary edema in in situ dog lungs
R. K. Albert, S. Lakshminarayan, N. B. Charan, W. Kirk, and J. Butler 1010

Regional lung function in erect humans after lobectomy
J. A. Fleetham, H. Clarke, and N. R. Anthonisen 1018

Effect of cold exposure on various sites of core temperature measurements
S. D. Livingstone, J. Grayson, J. Frim, C. L. Allen, and R. E. Limmer 1025

Anaerobic threshold, blood lactate, and muscle metabolites in progressive exercise
H. J. Green, R. L. Hughson, G. W. Orr, and D. A. Ranney 1032

Mechanical heart-lung interaction with positive end-expiratory pressure
T. W. Wallis, J. L. Robotham, R. Compean, and M. K. Kindred 1039

Topographical distribution of regional lung volume in anesthetized dogs
R. D. Hubmayr, B. J. Walters, P. A. Chevalier, J. R. Rodarte, and L. E. Olson 1048

Changes in diastolic coronary resistance during submaximal exercise in conditioned dogs
I. Y. S. Liang and H. L. Stone 1057

Estimation of human susceptibility to the high-pressure nervous syndrome
J. C. Rostain, C. Lemaire, M. C. Gardette-Chauffour, J. Doucet, and R. Naquet 1063

Ventilation-perfusion relationships during hemorrhagic hypotension and reinfusion in the dog
J. B. Fortune, R. W. Mazzone, and P. D. Wagner 1071

Effect of exercise on QRS duration in healthy men: a computer ECG analysis
A. L. Goldberger and V. Bhargava 1083

Paraquat inhibits mixed-function oxidation by rat lung
T. K. Aldrich, A. B. Fisher, and H. J. Forman 1089

Effect of central vascular engorgement and immersion on various lung volumes
M. J. Buono 1094

Surfactant dysfunction in diabetic offspring: inhibitors and fatty acid lecithin content
I. R. S. Sosenko, J. Werthammer, M. D. Cunningham, and I. D. Frantz III 1097

Citric acid airway constriction in dogs with hyperreactive airways
C. A. Hirshman, J. Peters, H. Downes, D. Leon, R. K. Lynn, J. Butler, and J. M. Hanifin 1101

Role of mediators in allergic and nonallergic asthma in dogs with hyperreactive airways
C. A. Hirshman, J. Peters, J. Butler, J. M. Hanifin, and H. Downes 1108

Effect of triiodothyronine on body temperature at rest and during exercise in dogs
J. M. Stager 1115

Effects of low concentrations of chlorine on pulmonary function in humans
H. H. Rotman, M. J. Fliegelman, T. Moore, R. G. Smith, D. M. Anglen, C. J. Kowalski, and J. G. Weg 1120

Ventilation distribution and density dependence of expiratory flow in asthmatic children
D. M. Cooper, R. B. Mellins, and A. L. Mansell 1125

Ventilation-perfusion relationships after hemorrhage and resuscitation: an inert gas analysis
N. B. Robinson, E. Y. Chi, and H. T. Robertson 1131

SPECIAL COMMUNICATIONS

Liquid ventilation in dogs: an apparatus for normobaric and hyperbaric studies
D. J. Harris, R. R. Coggin, J. Roby, M. Feezor, G. Turner, and P. B. Bennett 1141

A programmable electrical stimulator suitable for control of respiration studies
F. A. Hopp, E. J. Zuperku, and J. P. Kampine 1149

A pinhole method for measuring chest wall compliance
J. L. Grant and D. P. Moulton 1157

Measurement of ventilation using digitally filtered transthoracic impedance
P. E. Newton, L. H. Hamilton, and H. V. Forster 1161

Reproducibility of cardiopulmonary effects of different endotoxins in the same sheep

Dysanaptic lung growth: an experimental and allometric approach
J. P. Mortola 1236

Effect of hindlimb immobilization on the fatigability of skeletal muscle
F. A. Witzmann, D. H. Kim, and R. H. Fitts 1242

Effect of extracellular calcium on superoxide release by rat alveolar macrophages
H. J. Forman and J. Nelson 1249

Lactic acid infusion in dogs: effects of varying infusate pH
L. B. Gladden and J. W. Yates 1254

Effect of diaphragm contraction on canine heart and pericardium
T. C. Lloyd, Jr., and J. A. Cooper 1261

Respiratory movements of the vocal cords
T. Brancatisano, P. W. Collett, and L. A. Engel 1269

Dopamine, dobutamine, and phentolamine effects on pulmonary vascular mechanics
R. Graham, C. Skoog, W. Macedo, J. Carter, L. Oppenheimer, J. Rabson, and H. S. Goldberg 1277

Secretion of Weibel-Palade bodies observed in extra-alveolar vessels of rabbit lung
J. M. McNiff and J. Gil 1284

Molar absorptivities of human hemoglobin in the visible spectral range
W. G. Zijlstra, A. Buursma, and A. Zwart 1287

Fiber number and size in overloaded chicken anterior latissimus dorsi muscle
P. D. Golnick, D. Parsons, M. Riedy, and R. L. Moore 1292

Site of pulmonary hypoxic vasoconstriction studied with arterial and venous occlusion
T. S. Hakim, R. P. Michel, H. Minami, and H. K. Chang 1298

Effect of caffeine on skeletal muscle function before and after fatigue
J. M. Lopes, M. Aubier, J. Jardim, J. V. Aranda, and P. T. Macklem 1303

Effects of β-adrenergic blockade on ventilation and gas exchange during exercise in humans
E. S. Petersen, B. J. Whipp, J. A. Davis, D. J. Huntsman, H. V. Brown, and K. Wasserman 1306

Cardiovascular responses to exercise as functions of absolute and relative work load
S. F. Lewis, W. F. Taylor, R. M. Graham, W. A. Pettinger, J. E. Schutte, and C. G. Blomqvist 1314

Synchronized cycles in ventilation and vocal activity during spontaneous conversational speech
R. M. Warner, T. B. Waggener, and R. E. Kronauer 1324

Effect of ethanol on ion transport and electrical properties of dog trachea in vitro
F. D. McCool, J. P. Zorn, and M. G. Marin 1335e

Measurement of arterial blood gases at the transition from exercise to rest
B. M. Lewis 1340

Pulmonary effects of ozone exposure during exercise: dose-response characteristics
W. F. McDonnell, D. H. Horstman, M. J. Hazucha, E. Seal, Jr., E. D. Haak, S. A. Salaam, and D. E. House 1345

Changes in relaxation rate with diaphragmatic fatigue in humans
S. A. Esau, F. Bellemare, A. Grassino, S. Permutt, C. Roussos, and R. L. Pardy 1353

Calorimetry with heat flux transducers: comparison with a suit calorimeter
R. P. Layton, W. H. Mints, Jr., J. F. Annis, M. J. Rack, and P. Webb 1361

Effect of β-adrenergic blockade on hyperventilation and exercise tolerance in emphysema
R. J. A. Butland, J. A. C. K. Pang, and D. M. Geddes 1368

Esophageal elastance in anesthetized humans
G. Hedenstierna, P.-O. Jarnberg, L. Torsell, and I. Gottlieb 1374

Effects of 100% oxygen on lung vascular function in awake sheep
J. H. Newman, J. E. Loyd, D. K. English, M. L. Ogletree, W. J. Fulkerson, and K. L. Brigham 1379

Hyperpnea of exercise at various $P_{I_{O_2}}$ in normal and carotid body-denervated ponies
H. V. Forster, L. G. Pan, G. E. Bisgard, R. P. Kaminski, S. M. Dorsey, and M. A. Busch 1387

Hyperventilation in ponies at the onset of and during steady-state exercise
L. G. Pan, H. V. Forster, G. E. Bisgard, R. P. Kaminski, S. M. Dorsey, and M. A. Busch 1394

Cardiorespiratory responses to exercise distributed between the upper and lower body
M. M. Toner, M. N. Sawka, L. Levine, and K. B. Pandolf 1403

Effect of hypoxia and hypercapnia on catecholamine content in cat carotid body
R. S. Fitzgerald, P. Garger, M. C. Hauer, H. Raff, and L. Fechter 1408

SPECIAL COMMUNICATIONS

Noninvasive quantitative imaging of shape and volume of lungs
E. A. Hoffman, L. J. Sinak, R. A. Robb, and E. L. Ritman 1414

Preparation of a jugular vein cannula: use with a semiautomatic blood-sampling system
F. C. Tinsley, W. G. Short, J. G. Powell, and C. J. Shaar 1422

Cardiac output measurement using N_2O uptake: a method to subtract cardiogenic oscillations
W. T. Dawson and R. L. Johnson, Jr. 1427

Quantitative measurement of intrapulmonary and extrapulmonary right-to-left shunt
H. A. Jones, J. R. Stradling, J. C. Clark, E. E. Davies, and A. Rozkovec 1434

ABSTRACTS FROM CURRENT LITERATURE

No. 6. JUNE 1983

BRIEF REVIEW

Nonuniform lung deformations
T. A. Wilson 1443

Pulmonary denervation in the dog
P. S. Clifford, R. L. Coon, J. H. von Colditz, E. J. Zuperku, and J. P. Kampine 1451

Ventilatory responses to static handgrip exercise
S. R. Muza, L.-Y. Lee, R. L. Wiley, S. McDonald, and F. W. Zechman 1457

Effect of endotoxin on airway responsiveness to aerosol histamine in sheep
A. A. Hutchison, J. M. Hinson, Jr., K. L. Brigham, and J. R. Snapper 1463

Activation of α-adrenergic response in tracheal smooth muscle: a postreceptor mechanism
P. J. Barnes, B.-E. Skoogh, J. K. Brown, and J. A. Nadel 1469

Active inspiratory impedance in halothane-anesthetized humans
P. K. Behrakis, B. D. Higgs, A. Baydur, W. A. Zin, and J. Milic-Emili 1477

Transient ventilatory response to CO_2 as a function of sleep state in full-term infants
J. V. Anderson, Jr., R. J. Martin, E. F. Abboud, I. Z. Dyme, and E. N. Bruce 1482

Granulocytes mediate the increase in pulmonary vascular permeability after thrombin embolism
M. V. Tahamont and A. B. Malik 1489

Sympathetic and parasympathetic nervous control of airway resistance in dog lungs
H. Inoue, M. Ishii, T. Fuyuki, C. Inoue, N. Matsumoto, H. Sasaki, and T. Takishima 1496

Limitations of ventriculocisternal perfusion for determining brain interstitial fluid composition
S. W. Bledsoe, A. J. Berger, and T. F. Hornbein 1505

Transmembrane potential of isolated rat alveolar type II cells
V. Castranova, G. S. Jones, and P. R. Miles 1511

O_2 transport during two forms of stagnant hypoxia following acid and base infusions
S. M. Cain and R. P. Adams 1518

Ventilatory and occlusion pressure responses to helium breathing
E. L. DeWeese, T. Y. Sullivan, and P. L. Yu 1525

Saline immersion and the length-tension properties of alveolar wall
K. Takahashi, C. J. Martin, and C. Young 1532

Patency and compliance of pulmonary veins when airway pressure exceeds blood pressure
Y.-C. Fung, S. S. Sobin, H. Tremer, M. R. T. Yen, and H. H. Ho 1538

Ventilatory responses to inspiratory flow-resistive loads in awake and sleeping dogs
G. Bowes, L. F. Kozar, S. M. Andrey, and E. A. Phillipson 1550

Augmentation of α-adrenergic contractions in the trachealis muscle of living dogs
J. K. Brown, R. Shields, C. Jones, and W. M. Gold 1558

Opposing effects of dopamine receptor blockade on ventilation and carotid chemoreceptor activity
N. J. Smatresk, M. Pokorski, and S. Lahiri 1567

Reabsorption of a saline- or plasma-induced hydrothorax
G. Miserocchi, D. Negrini, E. Mariani, and M. Passafaro 1574

Power spectral analysis of the diaphragm electromyogram
T. K. Aldrich, J. M. Adams, N. S. Arora, and D. F. Rochester 1579

Prostaglandin D_2 inhibits hypoxic pulmonary vasoconstriction in neonatal lambs
J. B. Philips III, R. K. Lyrene, M. McDevitt, W. Perlis, C. Satterwhite, and G. Cassady 1585

Effect of sleep state and hypercapnia on alae nasi and diaphragm EMGs in preterm infants
W. A. Carlo, R. J. Martin, E. F. Abboud, E. N. Bruce, and K. P. Strohl 1590

Effect of tension and timing of contraction on the blood flow of the diaphragm
F. Bellemare, D. Wight, C. M. Lavigne, and A. Grassino 1597

Relaxant action of VIP on cat pulmonary artery: comparison with *acetylcholine, isoproterenol, and* PGE_1
Y. Hamasaki, M. Mojarad, and S. I. Said 1607

Effect of left pneumonectomy on lung mechanics in rabbits
N. M. Yee and R. E. Hyatt 1612

Maximal shortening of inspiratory muscles: effect of training
C. H. Fanta, D. E. Leith, and R. Brown 1618

Inhibition of hypoxia-induced ADH release by meclofenamate in the conscious dog
B. R. Walker 1624

Intercompartmental fluid shifts after dextran infusion in rabbits
V. Mohsenin and A. B. DuBois 1630

Diaphragm in emphysematous hamsters: sarcomere adaptability
G. A. Farkas and C. Roussos 1635

Transmural coronary vasodilator reserve and flow distribution *during severe exercise in ponies*
C. M. Parks and M. Manohar 1641

Myoelectric signal versus force relationship in different human muscles
J. H. Lawrence and C. J. De Luca 1653

Hypoxic constriction of alveolar and extra-alveolar vessels in isolated pig lungs
J. T. Sylvester, W. Mitzner, Y. Ngeow, and S. Permutt 1660

Surface pH responses of muscles of different fiber-type composition to catecholamines
G. J. Kost 1667

Hemodynamic responses during prolonged sitting
E. Shvartz, J. G. Gaume, R. T. White, and R. C. Reibold 1673

Length-tension relationship of mammalian diaphragm muscles
K. K. McCully and J. A. Faulkner 1681

Dynamics of O_2, CO_2, lactate, and acid exchange during contractions and recovery
R. W. Barbee, W. N. Stainsby, and S. J. Chirtel 1687

Vascular reactivity is increased in rat lungs injured with α-naphthylthiourea
N. S. Hill and S. Rounds 1693

Energetics of wet-suit diving in Korean women breath-hold divers
D. H. Kang, Y. S. Park, Y. D. Park, I. S. Lee, D. S. Yeon, S. H. Lee, S. Y. Hong, D. W. Rennie, and S. K. Hong 1702

Time course of deacclimatization to cold water immersion in Korean women divers
Y. S. Park, D. W. Rennie, I. S. Lee, Y. D. Park, K. S. Paik, D. H. Kang, D. J. Suh, S. H. Lee, S. Y. Hong, and S. K. Hong 1708

Elastic characteristics of the lung perivascular interstitial space
J. C. Smith and W. Mitzner 1717

Role of the larynx in control of pattern of breathing during CO_2 inhalation in humans
W. N. Gardner 1726

Respiratory effects of stimulation of intercostal muscles and saphenous nerve in kittens
T. Trippenbach, G. Kelly, and D. Marlot 1736

Expiratory and arterial partial pressure relations under different ventilation-perfusion conditions
A. Zwart, S. C. M. Luijendijk, and W. R. De Vries 1745
